PROFESSIONAL SUMMARY

Junior Web Developer with 1 year of hands-on experience in web application development, specializing in UI/UX design and frontend development. Experienced in creating responsive and user-friendly interfaces using modern web technologies while also contributing to backend development, RESTful API and AI integration. Highly motivated, fast learner, and adaptable professional passionate about building scalable and user-centered digital solutions.

WORK EXPERIENCE

Junior Web Developer

NTEK Systems Inc., Quezon City

September 2025 – May 2026

- Designed and prototyped **responsive UI/UX layouts and wireframes** using **Figma**, ensuring seamless transitions between mobile and web platforms.
- Delivered high-quality interfaces for **9+ diverse projects**, collaborating with cross-functional teams and stakeholders to align design goals with business requirements.
- Improved usability and accessibility for **AI-integrated and management systems** by optimizing user workflows.
- Assisted in **frontend development, application maintenance, and debugging** using modern web technologies and development workflows.
- Applied modern **UI/UX** and **web development** best practices to maintain **responsive** and **scalable** applications.

System Automations and Developer Intern

Optogrow Operations Management Services, Pasig City

March 2025 - May 2025

- Developed and managed **5+ high-converting marketing funnels and websites** in **GoHighLevel**, leading to improved lead conversion rates and more efficient marketing workflows.
- Developed custom email snippets and **automated sequences** that **reduced manual follow-up time** and enhanced overall client engagement.
- Integrated an **AI-powered chatbot** using **OpenAI** and **Consolidata**, which **automated 24/7 lead engagement** and significantly decreased initial response times for support inquiries.

Full-Stack Developer Intern

Meta Core Systems Inc., Caloocan City

July 2024 – September 2024

- Developed a **real-time financial dashboard** using **CodeIgniter**, **AJAX**, and **MariaDB**, automating expense tracking and reducing manual computation errors.
- Built responsive **Vue.js components** to digitize election and documentation workflows, replacing manual paper-based systems with automated UI.
- Enhanced system security by implementing **Role-Based Access Control (RBAC)** and **OTP email verification** for secure user authentication.

TECHNICAL PROJECTS

PUP Railway Engineering Accreditation Website | Wix Velo, JavaScript 2025

- Developed a **custom-themed document-management platform** utilized by faculty, **successfully securing AACCUP accreditation** through centralized evidence submission.

ONE Graceville | Django, Vue.js, MySQL 2025

- Developed a full-stack **Barangay Information Management System** officially **adopted as a PUP Extension Project**, which automated operations and public services for beneficiary communities.
